

Thank you very much for your interest in our Master's programme in Advanced Mechatronics. You will find below answers to some of the questions you might have.

How and when can I apply?

Here is information regarding the application campaign. The application platforms and deadlines depend on your country of citizenship. See directly on [Polytech Anancy-Chambéry website here](#).

What documents do you need to apply?

The following documents will be required for your application, whichever the process:

- a copy of your "baccalaureat" degree or equivalent degree corresponding to the end of secondary education, with its academic grade transcript
- the copies of your degrees with the corresponding academic grade transcripts and your rankings
- a description of the programmes you were enrolled in, up to now
- a resume (CV)
- a cover letter explaining your motivation for our programme and your professional project
- a copy of your identity card or passport
- language certificates and work certificates if any,
- any document you think useful for the evaluation of your application such as a (e)portfolio describing your achievements/projects and skills/competences completed to date if you apply through the first process described above.

Which level in English is required?

A B2 level in English (at least) is required since the classes of the programme are given in English and most of the master students are non-French-speaking people.

What are the tuition fees?

The tuition fees are approximately 245€ for an academic year. All students are also asked to pay what is called "CVEC" which stands for "[Contribution Vie Etudiante et Campus](#)", the amount of which was 95€ in 2022/2023. Thus, each student will probably have to pay approximately 340€/year to enrol in the programme.

When does the programme start?

The programme starts at the beginning of September.

What is the content of the Master's programme?

The lectures and tutorials of our Master's programme are given in English. The programme consists in 4 semesters (30 ECTS/semester). 3 of them are based on blended learning to allow the customization of your study path (classroom learning, self-study through e-learning, project- and problem-based learning). The last semester is devoted to an internship (minimum 16 weeks).

More detailed information about the programme is available in this [dedicated page](#) of the Polytech Anancy-Chambéry website.

Are there any housing opportunities?

You will find information about accommodation in **Annecy** in [this webpage](#).

Pay attention to the deadlines if you want to apply for [housing in a Crous student residence](#) (rather cheap housing managed by a French public institution for students). To increase your chance to get such a housing, it is recommended to apply as soon as possible, without waiting for the result of your application for the master's programme.

Miscellaneous complementary information

You will find [here general information](#) for foreign students about studying at Université Savoie Mont Blanc.

You will find general information on studying in France when visiting these two websites:
